Clear access to Europe

Gaming & Software

European market access

Swift international market access is the objective; comprehensive test reports and rapid certification are the means. NMI understands the commercial pressures under which you are working and is here to help. We have been committed for many years to providing timely solutions for our customers and we can do the same for you. We offer coordinated certification services for any combination of countries, jurisdictions and technologies that you may require.

International acceptance of test reports

NMI has licenses and approvals for 20 jurisdictions throughout Europe. The rigorous assessments required to achieve these approvals means our probity and independence are well established. NMI's reports are accepted in practically every European country, so your accelerated entry into the market is assured.

Local approach

The regulatory frameworks in the European jurisdictions are frequently complex and impose specific technical and functional demands on your products. Thanks to our strong links with the gaming regulators in these countries, we stay well-informed about the latest legal regulations and interpretations. With our up-to-date knowledge and good reputation, we offer clear

market access in your countries of choice.

NMI takes the view that Europe is comprised of countries with their own unique cultures, protocols, legislation and outlook. Through local offices in Europe, we can offer compliance testing services delivered by local experts in your own language and adapted to fit with your working practices and culture.

Independent, efficient and reliable

Having in-depth knowledge of the latest developments and applicable regulations in your target markets, NMI is able to undertake testing within very short timescales. Our close contact with the approvals-issuing authorities helps minimize the time-to-market. NMI is your trustworthy partner for rapid market access.

Independent testing and certification

NMi is an independent testing and certification laboratory and offers its services in the following markets:

AWP

The gaming machines found in amusement arcades, gaming centers, pubs and public spaces are complex regulated products. Licenses are required to distribute and operate these 'Amusements With Prizes' (AWP) and 'Limited Pay-out Machines' (LPM). In many countries, the national authority will provide a license based on a positive inspection report of an appointed examination body, such as NMi. The purpose of the license is to ensure that such products are fair and comply with country's legal requirements.

FOBT

Fixed Odds Betting Terminals (FOBTs) are typically located in Licensed Betting Offices (UK). They differ from AWP in that they generally offer random games with higher stakes and prizes, with themes similar to the 'real world' betting opportunities offered by the establishment in which they are sited. The licensing requirements for these machines are similar to those for AWP, and certifications by approved testing agencies, such as NMi, are required.

SBG

With intense competition for the substantial profits available to the operators of networked gaming systems, the market for Server Based Gaming (SBG, VLT) equipment and software is expanding rapidly. SBG platforms allow for the rapid distribution and organization of FOBT and AWP gaming content, and facilitate the gathering of business intelligence relating to usage, percentage returns and popularity. The regulatory requirements relating to such systems add an additional level of legal and technical conformance, and NMi has the skills and experience to undertake these approvals.

Casino

In a casino there can never be any question about the integrity or fairness of the games. Visitors have to be able to trust this implicitly. As a result, casinos work under rigorous quality systems that require their roulette wheels, card shufflers, sic bo and other live games to be certified. NMi has 25 years experience in evaluating and certifying live games in the Netherlands, Belgium and

Sweden, among other places. NMi is also well known as a testing lab for Casino Slot Machines, with EU-wide acceptance of our reports.

Lotteries

NMi has extensive and long-running experience of testing and certifying all kinds of lotteries. We have built up a reputation for helping lottery providers to comply efficiently with international legislation.

NMi lobbies internationally for effective, fair and practical legislation, with the goal of opening up access to international markets for providers with certified products. Whether your product is a scratch card or a lottery, NMi aims to reduce your regulatory overheads.

I-Gaming / Remote / Online / Mobile gaming

The accelerating uptake of the internet as a platform for gambling and games of chance cannot have escaped anyone's attention in recent years. With the addition of interactive televised gambling and mobile gaming, people now have instant, unfettered access to gambling opportunities at any time of the day or night and from almost any location on the planet. Customers of these services expect guarantees that the games are fair and safe to use.

As remote gaming applications are generally accessible from many countries simultaneously, they may have to comply with the laws of many different territories. NMi provides all of the facilities and expertise required to independently test and certify remote gaming equipment and software for many of these jurisdictions.

True Value

NMi is the independent expert for testing, certification, calibration and training in the fields of metrology and gaming.

NMi offers more than just a service – we guide you towards trouble-free market entry even for special applications and variations. NMi certificates and test reports are accepted worldwide. NMi can offer added value with speed, knowledge, reliability and acceptance through local expertise and communication in your language of choice.
